EDUCATION

Massachusetts Institute of Technology   Cambridge, MA

Ph.D. Candidate in Chemical Engineering and Computation   September 2019 – Present

- Coursework: Numerical Methods in Chemical Engineering, Quantum Chemical Simulation, Parallel Computing and Scientific Machine Learning, Introduction to Quantum Computing, Machine Learning for Molecular Engineering, Process Data Analytics

Graduate Certificate in Technical Leadership   September 2020 – Present

- Coursework: Negotiation and Influence Skills for Technical Leaders

University of Michigan   Ann Arbor, MI

B.S.E. in Chemical Engineering (*Summa Cum Laude*)   September 2015 – May 2019

- Concentration in Materials Science and Engineering, Minor in Mathematics
- Engineering Honors Program (Focus Area: Research)
- Coursework: Applied Data Science for Engineers, Numerical Methods, Structures of Materials, Electrical/Magnetic/Optical Materials, Physics of Materials, Boundary Value Problems in PDEs

Hong Kong University of Science and Technology   Kowloon, Hong Kong

International Summer Exchange Program   June – August 2016

RESEARCH EXPERIENCE

Massachusetts Institute of Technology

Doctoral Advisors: Rafael Gómez-Bombarelli and William Green (January 2020 – Present)

- Integrate machine learning with physics-based calculations and collaborate with experimental colleagues to predict molecular optical properties using multi-fidelity methods
- Implement uncertainty quantification and active learning to acquire data for model improvement
- Utilize generative models to propose molecules that satisfy multi-objective constraints

Eli Lilly and Company

Medicines Innovation Hub Internship (May – August 2022)

- Implemented predictive modeling and active learning strategies for imbalanced biological assay data
- Evaluated quality of impurity predictions in ASKCOS software

Microsoft Research New England

Micro-internship. Mentors: Kevin K. Yang and Ava P. Soleimany (January 2022)

- Implemented a panel of machine learning uncertainty quantification methods and metrics to benchmark performance on protein engineering tasks with varied domain shifts

University of Michigan

Prof. Emmanouil Kioupakis Group (September 2017 – May 2019)

- Performed first-principles density functional theory calculations using VASP to calculate structural, electronic, and thermodynamic properties of nitride semiconductors
- Demonstrated quaternary alloy strategy to mitigate lattice mismatch and increase efficiency of InGaN LED materials

Prof. Katsuyo Thornton Group (June – August 2017)

- Simulated lithiation/delithiation processes for core-shell cathode nanoparticles in Li-ion batteries
- Proposed an effective solution to capacity reduction observed in certain nanoparticle designs

Prof. Max Shtein Group (September 2016 – May 2017)

- Created a novel type of spring and characterized its mechanical properties
- Designed a testing plan and apparatus to measure stress-strain behavior of kirigami cut patterns

Purdue University Summer Undergraduate Research Fellowship

Network for Computational Nanotechnology – Prof. Peilin Liao Group (May – August 2018)

- Developed an open-source tool for nanoHUB.org using Quantum ESPRESSO, Python, and the Atomic Simulation Environment to calculate properties of interest for heterogeneous catalysis from first principles

TEACHING EXPERIENCE AND PEDAGOGICAL TRAINING

MIT Chemical Engineering Department

Graduate Teaching Assistant: Machine Learning for Molecular Engineering (January – May 2022)

- Faculty: Profs. Connor Coley, Ernest Fraenkel, and Rafael Gómez-Bombarelli
- Coordinated with one other TA to prepare and grade homework assignments, hold weekly office hours, and manage all course logistics for 60 students (undergraduate and graduate)

KEVIN P. GREENMAN

✉ kpg@mit.edu ☎ 269-832-0808

🌐 www.kevinpgreenman.com **in** linkedin.com/in/kevinpgreenman ⓘD orcid.org/0000-0002-6466-1401

MIT Teaching + Learning Lab

TA Days Training (January 2022)

- Learned strategies to support student well-being and to facilitate effective office hours

Grad Teaching Development Tracks Certificate Program

- Inclusive Teaching Track (May 2021); Microteaching Track (March 2021); Lesson Planning Track (January 2021); Subject Design Track (June 2020)

MIT Chemical Engineering Teach-Off Competition

1st Place Awardee (April 2021)

- Prepared and taught a 10-minute virtual lesson and was judged to be the best out of seven graduate student and postdoc competitors in the department by a panel of teaching experts

University of Michigan Department of Chemical Engineering

Computational Lead – Chemical Engineering Team – Perch Education (February 2018 – May 2019)

- Created the computational curriculum for a new class to reduce barriers to undergraduate research in collaboration with faculty, graduate students, and undergraduate students

Instructional Aide – Fluid Mechanics (January – April 2018, January – April 2019)

- Coordinated with one other instructional aide to prepare practice problems, teach a weekly review session, and hold weekly office hours for 100 students

University of Michigan Science Learning Center

Study Group Facilitator – Organic Chemistry II – 2 semesters (January – December 2017)

- Facilitated a two-hour weekly study session to help thirteen group members improve understanding of material
- Attended workshops on evidence-based teaching and learning techniques

MENTORSHIP EXPERIENCE

MIT Undergraduate Research Opportunity Program (UROP)

- Temujin Orkhon (Spring 2023 – Present)
- Rui-Xi (Ray) Wang (Spring 2023 – Present)
- Alor Sahoo (Fall 2022) – Now pursuing SB in Computer Science at MIT (2026)
- Cale Gregory (Spring 2022) – Now pursuing SB in Computer Science at MIT (2023)
- Elenna Kim (Spring 2022) – Now pursuing SB in Computer Science at MIT (2025)

MIT Chemical Engineering Application Mentorship Program (ChAMP) (Fall 2020, 2021)

- Provided application feedback to students from underrepresented backgrounds applying to the chemical engineering Ph.D. program at MIT

MIT Netpals (January – May 2020)

- Mentored a student from a local middle school by practicing email etiquette and discussing science

MIT Graduate Application Assistance Program (GAAP) – Office of Graduate Education (Fall 2019)

- Provided application feedback to a student from an underrepresented background applying to a Ph.D. program at the Institute

OTHER RELEVANT EXPERIENCE

Battle Creek Municipal Wastewater Treatment Plant
Laboratory Intern (January – May 2015)
- Conducted laboratory tests to evaluate efficacy of water treatment methods
- Monitored pollutant levels in water discharged from local factories

HONORS AND AWARDS

- National Science Foundation Graduate Research Fellowship (2021) – Tuition and stipend for 3 years of graduate study and research
- Tau Beta Pi Fellowship (2020) – Awarded by the Tau Beta Pi Association to 30 students in the nation on the basis of scholarship, leadership and service, and the promise of substantial achievement.
- Robert T. Haslam (1911) MIT Chemical Engineering Fellowship (2019) - Full tuition and stipend for one academic year
- Dean's List (2015-2019) – Awarded by the University of Michigan College of Engineering for 8 consecutive semesters.
- Henry Ford II Prize (2018) – Awarded to the top junior in the University of Michigan College of Engineering.
- Tau Beta Pi Scholarship (2018) – Awarded by the Tau Beta Pi Association on the basis of academic achievement, extracurricular activities, and the promise of substantial contributions to the engineering profession.
- AIChE Donald F. Othmer Sophomore Academic Excellence Award (2017) – Presented to one AIChE student member in each student chapter who has attained the highest scholastic grade-point average during his/her freshman and sophomore years, on recommendation of the Student Chapter Advisor.
- Tau Beta Pi First-Year Award (2016) – Awarded by the Michigan Gamma chapter to three first-year students in the College of Engineering.
- William J. Branstrom Freshman Prize (2016) – Awarded by the University of Michigan for ranking in the top 5% of the College of Engineering freshman class after the first term.

PROFESSIONAL AFFILIATIONS

American Society of Engineering Education (July 2023 – Present)

United States Research Software Engineer Association (March 2023 – Present)

American Chemical Society (March 2021 – Present)

Society of Catholic Scientists (May 2019 – Present)
Harvard-MIT Chapter Co-Founder and Co-President (August 2022 – Present)

Tau Beta Pi Engineering Honor Society (December 2016 – Present)
MI-G Chapter Advisor (January – April 2019)
MI-G Chapter President (April – December 2018)
- Managed a team of 17 officers and 7 advisors to carry out chapter programming and operations

KEVIN P. GREENMAN

✉ kpg@mit.edu ☎ 269-832-0808

🌐 www.kevinpgreenman.com **in** linkedin.com/in/kevinpgreenman ⓘ orcid.org/0000-0002-6466-1401

- Engaged approximately 200 members in service, social, and professional development events

MI-G Chapter Professional Development Officer (April 2017 – April 2018)

- Planned and promoted 17 corporate information sessions on campus for up to 150 attendees

American Institute of Chemical Engineers (September 2016 – Present)

American Physical Society (October 2018 – 2019)

SKILLS

Languages: Python | shell (bash/zsh) |MATLAB | Julia | Mathematica | C++ | Fortran
Tools: git | vim | LaTeX | Django | Drupal
Software: PyTorch | VASP | Quantum Espresso | Avogadro | VESTA | ChemDraw | Aspen Plus | COMSOL Multiphysics | SolidWorks
Project Management: Agile | Kanban | Scrum
Platforms: Mac | Linux | Windows

PROFESSIONAL SERVICE

Awesome Chemical Engineering Education
Creator and Maintainer (June 2023 – Present)

- Curate an open-source list of online chemical engineering education resources
- https://github.com/kevingreenman/awesome-chemical-engineering-education

Conference Reviewer

- Learning on Graphs Conference (2022)

MIT Chemical Engineering Department
Graduate Student Council for Course 10 (GSC-X) (July 2020 – August 2021)

- Coordinated intramural sports teams and planned virtual social events to promote community and well-being during COVID-19 crisis

Michigan Undergraduate Research Symposium
Co-Founder and Organizer (November 2018 – May 2019)

- Raised over $12,000 in funding to support the first annual symposium for undergraduates from all disciplines to present research on campus and earn travel awards to present at conferences
- Collaborated with six other undergraduates to organize the event with 150 presenters and 100 judges
